

Jimmy

Libot

AI VIDEO +
AUTOMATION

Specialist

CAPABILITIES

AI video direction

Concept, prompt, edit,
and finish

Automation systems

Repeatable workflows
and observability

Creative operations

Bridging ideas and
repeatable output

WORKING MODE

Remote / Worldwide

Available for focused
collaborations

A practice built around
sharper visuals, calmer
systems, and the human
eye behind both.

PROFILE

Make the work move before the work begins.

I help teams use AI video and automation to make sharper work, smoother handoffs, and more repeatable output — without losing human direction.

PRACTICE FOCUS

01 / Direction

Find the sharpest version of a brief, then give it a visual language with atmosphere, pace, and a point of view.

02 / Systems

Turn repeatable tasks into calm, observable systems that give creative teams their time back.

THE METHOD

- 01 Signal**
Find the clearest next move.
- 02 Frame**
Shape the visual and system logic.
- 03 Release**
Ship an output built to repeat.

START WITH THE SIGNAL

Have a project that needs a sharper system?

Tell me what you are making, where the friction is, and what better would look like.
